MANAGEMENT REVIEW: 2010-11

INDIAN PAPER INDUSTRY SCENARIO

The Indian Paper Industry is a booming industry and is expected to grow in the years to come. The usage of paper cannot be ignored and this awareness is bound to bring about changes in the paper industry for the better. It is a well known fact that the use of plastic is being objected to these days. The reason being, there are few plastics which do not possess the property of being degradable, as such, use of plastic is being discouraged. Excessive use of non degradable plastics upsets the ecological equilibrium.

Indian paper industry uses used paper for the manufacturing of paper after recycling. It has been estimated that around 40% of paper used is recycled.

The demand scenario in paper industry was sluggish during the year 2009 due to the economic recession and this scenario persisted till the end of the financial year 2009-2010. The weak demand followed by the economic recession, and uncontrolled imports from China and Indonesia kept prices under pressure.

However, with the fiscal supports extended by the Government of India as well as the cautious approaches by the Industry, the year 2010 from the 2nd quarter witnessed the demand cycle reversing primarily driven by demand from Educational and FMCG sectors and closure of many capacities in various parts of the world, particularly in European Union. The growth in the paper industry has mirrored the growth in GDP and the Indian paper industry has grown on an average 6.7% over the last few years.

FUTURE OUTLOOK:

India's per capita consumption of paper is one of the lowest in the world. The per capita consumption of paper in India is very low ie 7kgs in 2006 as compared to average consumption of 28 Kgs and 58 Kgs in Asia and world respectively.

According to industry estimate the total demand for the paper is around 8.0 million tonnes and is expected to grow to 10 million tonnes by 2012 and 20 million tonnes by 2020. The futuristic view is that growth in paper consumption would be in multiples of GDP and hence an increase in consumption by one kg per capita would lead to an increase in demand of 1 million tons.

With the expected increase in literacy rate, demand from corporate and industrial segments and with the growth of the economy, an increase in the per capita consumption of paper is expected. As per industry estimates, paper production is likely to grow at a CAGR of 8.4% while paper consumption will grow at a CAGR of 9% till 2012-13.
